

GMRP helps Macon Occupational Medicine staff Navicent Health's Baldwin facility in just 24 hours

Macon Occupational Medicine

Macon Occupational Medicine is a comprehensive program that serves over 2,500 businesses and industries on an annual basis throughout the state of Georgia. They are an occupational health resource for Navicent Health, servicing all Navicent employees with physicals and worker's compensation injuries.

Challenge

In September 2017, Navicent Health, a Vizion MidSouth member, needed to onboard more than 500 employees at its Baldwin facility located in Milledgeville, Georgia. In order for Navicent to begin operations, testing had to be completed in 8 days and consisted of physicals, immunizations, blood draws and drug testing.

Solution

Georgia Medical Resource Pool, LLC (GMRP) provided temporary health care staffing to help Macon Occupational Medicine meet its contract requirement with Navicent Health. With only 24 hours' notice, GMRP put together a schedule that included 2-3 registered nurses per day.

Results

GMRP successfully provided over 200 hours of temporary health care staffing to meet Navicent Health's requirements in just 24 hours.
